- CodeIgniter4/WordPress
- HTML5/CSS3/SCSS
- Bootstrap 5
- Tailwind CSS
- GIT

Professional Summary

I am an experienced Junior Full Stack Web Developer with two years of professional experience. Currently, my primary focus is on FrontEnd technologies as I continue to expand my skills in web development. I completed the PHP course at ITAcademy in 2018, which marked the beginning of my journey into the field. Following that, I undertook three professional internships and later transitioned into freelance work, developing projects independently.

My career path eventually led me to a FullStack developer position within a company. Alongside my practical experience, I have successfully completed various professional courses, consistently enhancing my knowledge. I have a strong passion for continuous learning and adapt quickly to new challenges, which makes me a valuable team player.

I consider myself an extrovert, always eager to explore new horizons, and I easily integrate into diverse environments. With a forward-thinking and ambitious mindset, I am constantly striving for personal and professional growth.
