Professional Summary

I am a Junior Full Stack Web Developer with a year and a half of work experience. Currently, I mainly study and work on FrontEnd technologies and go in the direction of additional development. I successfully completed several professional courses and further improved my knowledge. Every day I read or learn something new and I am quickly adaptable because I am a team player. I am an extrovert I like to explore and I fit in easily everywhere. I am very ambitious and always looking ahead.
Now I am improving my skills in this direction and plan to expandthem with new technologies.
In my free time, I play table tennis and love to travel.
